

Zakarpattia, Ukraine

D7 - Local Action Plan

Authors:

FORZA

Natalia Voloshyn, Lesya Loyko

 University of Bologna Mentor: Caterina Selva

0. Reading This Local Action Plan

This Local Action Plan (LAP) documents the co-development process of solutions undertaken by each Dynamo to establish and empower its local Multi-Actor Rural Innovation Ecosystem (RIE). It is the result of a 12-month participatory and inclusive community-led process from May 2024 to May 2025, and contains both the description of the four steps taken to activate the RIE as well as the co-developed, innovative, place based solutions that will be implemented to support the just, sustainable and smart transition of the Dynamo's territory.

The solutions described in the LAP target one or more core Rural Development Drivers (RDDs, namely: Sustainable multimodal mobility; Energy transition and climate neutrality; Sustainable agrifood systems and ecosystem management; Nature-based and cultural tourism; Culture and cultural innovation; Local services, health and wellbeing) and integrate aspects from the three RURACTIVE crosscutting priorities (climate change mitigation and adaptation, social justice and inclusion, and biodiversity), and take into account gender considerations. During the codevelopment phase, Dynamos activated, engaged and empowered the local community through four Local Workshops (LWs) that provided support in defining their place-based solutions. This LAP presents the results of these four LWs, highlighting the crucial role of the local community in creating each solution proposal. For further reference to the methodology to activate the RIE and to the conceptual framework of RURACTIVE, the full documents are available on the website.

Each LAP is organised into six main sections:

- Background and Strategic Vision Introduces the territory, its cultural identity, socioeconomic profile, and key development challenges. Further, it outlines the chosen RDDs that guided the focus of local action.
- Step 0: Getting Started Describes the early activities to set up the foundational elements of the RIE and frame the work, including the selection of the RDDs and territories where the LAPs will be implemented, mapping of previous participatory processes, and a review of relevant local and regional policies.
- Step 1: Identification describes the activities undertaken for brainstorming, analysing and prioritising local stakeholders
- Step 2: Engagement explains how local actors were involved through events like Open Days and the creation of Local Task Forces (LTFs).
- Step 3: Empowerment summarises the series of Local Workshops (LWs 1–4), the recruitment of Local Community Trainers (LCTs) for capacity building and training of local communities, how local challenges were identified, and how solutions were co-designed and refined through structured participation.
- Place-Based Solutions Lists the key challenges identified and introduces detailed breakdowns of the main place-based solutions co-developed with RIE stakeholders to be carried forward into the implementation stage starting from September 2025

This LAP serves as both a strategic roadmap and a practical implementation tool. It is intended to guide the co-implementation of local solutions and to support replication efforts by other rural communities across Europe in the future. The LAP has been collaboratively developed by the Dynamo partner in close cooperation with their RIE stakeholders, with support and guidance from mentors at the University of Bologna and RURACTIVE project partners.

1. Background Information

The Zakarpattia region, located in Ukraine, is of unparalleled beauty and rich cultural diversity, with pristine forests that cover a significant portion of its landscape. These dense woodlands are not merely a source of timber but also the backbone of the region's ecological stability. The region's economic structure is intricately linked to its natural resources. Boasting over 50% forest cover, agriculture and industry contribute almost equally to the gross added value. Social and digital innovations hence can be centred on sustainable forest management, promoting eco-tourism, and harnessing the potential of these ecosystems for local economic development. The focus under RURACTIVE is on the Synevyr rural municipality. It includes two larger villages: Synevyr and Synevyr Poliana, and several smaller hamlets: Svoboda, Zahorb, Zaverkhnia Kychera, Berehy. The Total population of the municipality is a little bit over 6,5 thousand inhabitants.

Uniqueness & Cultural Identity

The region stands out for its unique cultural identity, shaped by centuries of interaction at the crossroads of different states, traditions, and languages. This multicultural legacy is a living part of everyday life. Communities here have long adapted to changing governance and shifting borders. This deep-rooted cultural adaptability is both a strength and a key consideration for the implementation of sustainable development efforts. Traditions such as seasonal grazing, dairy production, wild herb and berry gathering, and traditional crafts are vital not only as ways of earning a living but also as means of preserving cultural heritage. The mountainous environment enhances this uniqueness. With 51% forest cover, the region's natural beauty and ecological richness are integral to its cultural and social fabric. However, maintaining this identity is increasingly challenged by outmigration, particularly among younger generations seeking work in other parts of Ukraine or abroad. Despite these challenges, the region's strong sense of place, cultural continuity, and community values offer a powerful foundation for revitalization.

Strategic Vision & Key Challenges

The Synevyr rural municipality is surrounded by the protected areas of the National Nature Park "Synevyr", which creates both opportunities for sustainable natural resources management and sustainable tourism development and limitations for people regarding the use of natura resources. The rural municipality of Synevyr is one of the most remoted in the region, located in between mountains, at the northern part of the community (Svoboda village). This geographic isolation significantly affects the quality of life and access to basic services. Challenging natural conditions, limited infrastructure, and a lack of employment opportunities contribute to a pattern of outmigration—especially among young people. Many leave the municipality in search of education or work elsewhere, never returning to the municipality of origin. This ongoing demographic decline presents a major challenge for the long-term vitality of the community. Many people, who stay in the municipality, do traditional household duties and land management. Traditional sheep grazing (transhumance farming) used to be a common practice in the surrounding area, now with scarce initiatives to revive this type of traditional land management and farming.

2. Step 0: Getting started

2.1. Chosen RDDs

Sustainable agri-food systems and ecosystem management

Synevyr rural municipality has basically two official producers of food products: a bakery and sheep farm for sheep cheese production.

Despite this, there is potential for small-scale food production, like processing wild-growing mushrooms, berries and herbs; meat and dairy products; traditional pastry.

There was also a very good initiative called Synevyr-Eco, which is an online marketplace for the selling of local products.

Recent initiative on the revival of a local sheep breed for the production of sheep cheese, wool and meat both in the community and across the region bring the need to ensure the quality of products along with sustainable farming.

The region in general, and the community in particular, also have cases of beekeeping which makes another food product potentially marketable; and improve or maintain its quality both for local consumption and to meet visitors' demand.

All these cases are examples of small-scale food production, which allow local people to generate income for their own subsistence.

Nature-based and cultural tourism

The community, as well as other similar places, located in Zakarpattia, has excellent untapped potential for the development of sustainable tourism. Surrounded by the protected lands of National Nature Park "Synevyr" covered with forests and alpine meadows, mountainous streams and Tereblia river, cultural heritage of this area, like traditional land management practices (hay cutting, transhumance pasturing, collection of herbs, mushroom and berries), rituals and traditions for various special days (religious and social), crafts (carpet weaving, coat weaving), clothes, songs, local dialect, etc., make this place attractive for visitors.

At the same time, there are some issues related to the hospitality sector and services offered to tourists, which require certain attention and searching for innovative solutions.

The development of sustainable mobility is crucial for the community of Synevyr due to several critical challenges in the quality of road infrastructure and public transport services, lack of sidewalks for pedestrians, infrastructure for cyclists and rules enforcement for safety of pedestrians and cyclists, public transportation services, street lighting, to name a few.

This situation is especially critical for vulnerable groups, e.g.: schoolchildren, the elderly, socially disadvantaged, people with disabilities, etc.

In winter, the problem with mobility is exacerbated by the lack of snowploughs and uncleared roads and sidewalks. Narrow and mountainous roads without proper pavement make it difficult to move between the remote parts of the settlement.

In addition, the lack of effective communication between carriers and residents, unstable mobile communications, and a lack of road infrastructure maintenance complicate access to services and limit the mobility of the community.

Meanwhile, there is a demand both from the inhabitants and from community visitors for adequate public transport and reasonable conditions for pedestrians and cyclists and other disadvantaged groups.

2.2. Starting to set up the RIE

The process started with screening of the existing participatory processes in the community aimed at community development as well as looking at the environment and actors operating in local development. This analysis revealed that the municipality benefits from strong leadership, particularly through the proactive efforts of the official community leader and the municipal project manager. Both have been actively working to promote the community and foster partnerships with a range of external collaborators.

In the three years leading up to the RURACTIVE project, the municipality has participated in the following participatory local development processes:

- 1. Development of Community Development Strategy (approved in 2022);
- 2. Piloting local product marketing platform "Synevyr-Eco";
- 3. Implementation of the sustainable tourism project "Horiany", in close collaboration with National Nature Park;
- 4. Starting social a business initiative on the revival of transhumance practices;
- Support and collaboration with local entrepreneur on social business initiative on revival of transhumance sheep grazing, establishment of sheep cheese tasting place, diversification of processed food products from sheep milk and meet, other;
- 6. Collaborative process of the community spatial plan development (in process).

Two venues within the community were selected for stakeholder meetings, each situated in one of its largest villages: Synevyr and Synevyr Poliana.

In Synevyr, the primary venue selected was the municipality's main office meeting room, with the option to extend activities to nearby facilities such as the Youth Hub and the local music school. In

Synevyr Poliana, meetings were hosted at the tasting room of the private local initiative, "Shepherd's Corner," offering a more informal and community-rooted setting.

Figure 1. Selected RIE site (i.e., the Youth Centre in Synevyr Community Club and Visit Centre in Synevyrska Otara Dairy.

The Dynamo coordinator was decided to be the NGO FORZA, with Lesya Loyko and Natalya Voloshyna as the main coordination managers.

2.3. Local Policy Analysis Results

The local policy analysis was done in accordance with the methodology provided by the task leaders, trying to look at the policies, strategies, plans and other documents, both at national and regional/local level that could support the implementation of social innovations in the rural areas of the Ukrainian dynamo.

While there are many supportive policies mentioned below, particularly related to the cross-cutting priorities of the project, local level development plans are really the ones that define the development directions, operational goals, activities and tasks for the community.

Among the most important cross-cutting supportive policies are:

Gender equality and equal rights and opportunities:

- National Strategy on closing the gender gap in salaries until 2030 (2023)
- Strategy of gender equality in education until 2030 (2022)
- State Strategy on ensuring equal rights and opportunities for women and men for the period until 2030 (2022)
- National Strategy in the field of Human Rights (2021)
- National Action Plan on the implementation of the Convention on the Rights of Persons with Disabilities until 2025

Environmental safety, climate change and biodiversity:

National Strategy on barrier free environment in Ukraine until 2030

Convention on the protection of biological diversity from 1992 (1994)

- Order of consideration, approval and implementation of targeted environmental (green) investments and offers on the implementation of activities, related to the implementation of such projects and implementation of the responsibilities of parties to Kyoto protocol of The UN Framework Convention on Climate Change (UNFCCC)
- Convention on environmental impact assessment in cross-border context (ratified 1999)
- Ramsar Convention (ratified 1975)

Youth:

National Youth Strategy until 2030 (2021)

Main policy documents, Dynamo can refer to and rely on are the following:

- Strategy for environmental safety and climate change adaptation to the year 2030
- The Framework Convention on the Protection and Sustainable Development of the Carpathians (ratified in 2004) and its protocols (on Sustainable Transpot; on Sustainable Tourism; on Sustainable Forest Management; on Sustainable Biodiversity; on Sustainable Agriculture and Rural Development.
- Convention on the protection of biological diversity from 1992 (1994)
- Development Strategy for Zakarpattia region for the period 2021-2027
- Strategy of Synevyr Territorial Community Development for 2023-2027
- Synevyr National Nature Park Management Plan (new plan is being developed)
- Synevyr Territorial Community Spatial Plan (under elaboration)
- Zakarpattia regional program for tourism and resorts development
- CONCEPT of Ukrainian Carpathians mountainous territories development.

What do our local policies tell us?

Sustainable multimodal mobility

- elimination of infrastructure limitations
- development of spatially balanced road
- cycling infrastructure development

Sustainable agri-food and ecosystem management

- transition to the close to nature silviculture
- use of nature-friendly harvesting technologies
- improve resistance of forests against climate change
- decrease of forest fires occurance
- enhancement of the roles of forest sector in climate change mitigation, with special attention at seeking the right balance among increase of carbon stock in forest ecosystems
- support to the use of renewable energy from wood and smart use of wood products as replacement of raw materials from non-renewable sources
- sustainable labour productivity increase in the agricultural sector
- sustainable systems for the food security and greenhouse gas removal
- achieving sustainable development of rural and mountainous territories, also by means of agriculture
- marketing and promotion of organic food products and non-food items
- support for beekeeping and honey production
- support to highly technological enterprises on primary and deep processing of raw resource (fruits and berries) and on forest and agricultual residues processing for energy production
- introduction of educational program for youth on business skills in traditional mountainous sectors of agri-, forestry, traditional crafts with use of innovations
- creation of agricultual services cooperatives and agricultural production cooperatives in mountainous settlements

Nature-based and cultural tourism

- sustainable use of natural resources, blocks the threats for biological and landscape diversity, on which it depends, and minimizes negative impact on environment, ecology, culture and society
- a significant postindustrial and digital transformation, also in creative industries
- implementation of the number of cluster initiatives in tourism and ecosystem management
- building up of modern tourism infrastructure
- competitive tourism products market
- increase of quality of tourism services
- effective use of natural, cultural and recreational touristic potential
- creation of income generating opportunities for people in remote settlements, self-employment
- creation of the network of tourism information centers;
- information dissemination on rural tourism development opportunities;
- creation of Ukrainian Carpathians brand;
- festival activities, preservation of culture, traditions and rituals

Figure 2. Local policy factsheets based on the chosen RDDs.

Climate change mitigation and adaptation

Biodiversity

Social

iustice and

inclusion

- assess climate impacts on society, economy and nature
- integrate adaptation in sectoral and local policies
- ensure the better use of climate data
- special attention to ten vulnerable sectors: biodiversity; water resources; energy; public health; fisheries; agriculture and soils; forestry; cities and territorial communities; transport and infrastructure: coastal areas, and tourism
- decrease air and water pollution, non infectous diseases level, waste
- formation in the society of the environmental values and basics of sustainable consumption and production
- introduction of the education aimed at sustainable development. environmental education and awareness raising
- river bank enforcement, avalanche protection, hydrotechnical, carst prevention constructions;
- introduction of the waste sorting system, solutions of waste landfills, issues of water supply and waste water processing

What do our local policies tell us?

- evaluation of attitude and increase of awareness raising in the society on the condition and values of biodiversity and activities, needed for its preservation, revival and sustainable use

- decrease of biodiversity lossess
- ensuring protection of bio- and landscape diversity
- formation of holistic and representative network of nature protection areas
- increase of nature-protection fund area in the country
- promote the conservation of wild flora, wild fauna and natural habitats, with particular attention to endangered, endemic and vulnerable species and habitats
- cultivation of wild-growing and medicinal herbs for biodiversity preservation
- creation of international education and research center of Beech primeval forests, environmental education and sustainable development
- reforestation actions
- developing and implementing transnational strategies, programmes and projects for protecting and sustainably developing the region
- provides educational opportunities, by improving level of knowledge and respect to the natural ecosystems and biological resources
- integrates social and cultural authenticity of local population, by preserving its formed existing cultural heritage and traditional values, contributes to the intercultural understanding and supports tolerance
- makes contribution to the performance of viable long-lasting economic activity, providing social-economic benefits, distributed fairly, to all stakeholders, particularly via permanent employment and income generating opportunities and social services to local communities and, also, contributes to the powerty reduction
- achieving equal rights and opportunities for women and men in all fields of civil society performance, at the central and local level of executive power bodies, self-governing bodies, civil society institutions, business entities, including overcoming of the consequences of war
- ensure priority of rights and freedoms in the work of public institutions, businesses and society
- create opportunities for youths, to be competitive, participate in the social life, make a conscious
- professional education

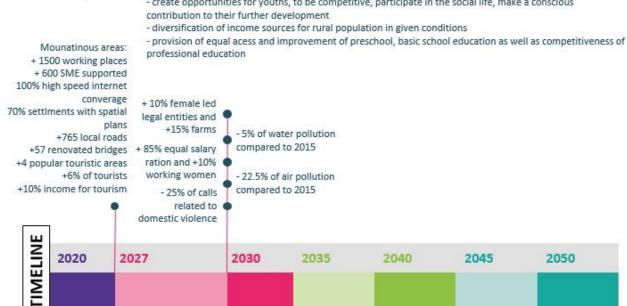

Figure 3. Local policy factsheets based on and the crosscutting priorities.

3. Step 1: Stakeholders Identification: brainstorming, analysing and prioritizing

3.1. RIE composition

This part of the preparation was devoted to the identification of stakeholders, involved or with the potential to be involved in the local development of rural areas.

There were 31 stakeholders identified, with whom collaboration around RURACTIVE initiatives should be further explored, related to different RDDs of interest and belonging to diversified domains. The list follows:

- 1. Synevyr Territorial Community Rural Municipality
- 2. Synevyrska Otara (Synevyr Flock)
- 3. Synevyr Eko
- 4. Silver Guide
- 5. Kolochava Territorial Community Rural Municipality
- 6. Zakarpattia Regional Department of Tourism
- 7. Zakarpattia Regional Department of Environment Protection
- 8. The association of tourist guide experts of transcarpathia (atget)
- 9. Association of Mountain Guides of Zakarpattia
- 10. National Nature Park (Synevyr)
- 11. Uzhhorod National University
- 12. Zakarpattia Regional State Administration
- 13. Zakarpattia Regional Council
- 14. Khust District Administration
- 15. Khust District Council
- 16. Civil society organization "Agency of regional development and innovations "Centre Mizhhirya"
- 17. Non-governmental organization "Beekepers union of Mizhhirya Synevyr"
- 18. Non-governmental organization "Beekepers union BDZHILKA"
- 19. TRANSCARPATHIAN UNION OF BEEKEEPERS SILVER LAND
- 20. Zakarpattia Beekeepers Association
- 21. NGO "Kryshtaleve Dzherelo" (NNP's Tyukh)
- 22. Pylypets Territorial Community Rural Municipality (Richka village)
- 23. U-Lead with Europe Zakarpattia office
- 24. Transport service providers at the district/local level
- 25. Hard fuel stove sellers
- 26. Electric bicycle sellers
- 27. IT-Cluster of Zakarpattia
- 28. Lisosad eco-food
- 29. Centre of Gender Studies
- 30. Synevyr Community Development Agency
- 31. Frankfurt Zoological Society

The stakeholder matrix of the analysis of the above listed organizations and people, resulted in a pool of interested and influential stakeholders, along with rather large groups of stakeholders with high interest, but low influence, and both low interest and low influence. Red marks show the stakeholder belonging to groups at risk of exclusion, which makes them a priority for collaboration.

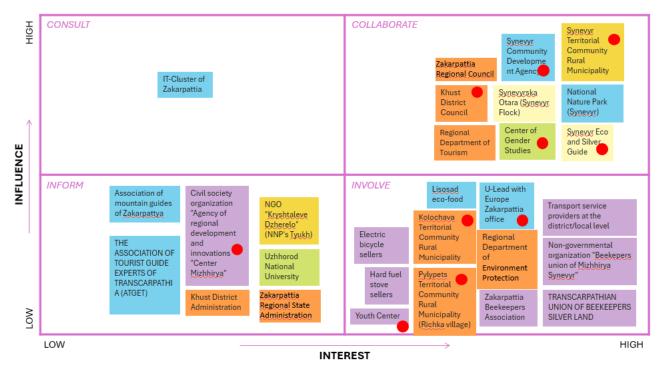

Figure 4. Stakeholder identification matrix. Red dots represent stakeholders at risk of exclusion. The domains are represented by the colours: (Policy = orange, Research = green, Industry/services/investors = blue, Public/user = purple).

The prioritization process was done using the stakeholder matrix approach, analysing the level of influence and level of interest of each stakeholder and taking into consideration inclusivity. Thus, it led to a list of prioritised stakeholders to be involved in the RIE activation process, namely:

- 1. Synevyr rural municipality;
- 2. Synevyr development agency;
- 3. Zakarpattia regional council;
- 4. Khust district council;
- 5. Kolochava territorial rural municipality;
- 6. Centre of Gender Studies of UzhNU;
- 7. Zakarpattia regional departments: of tourism and resorts; of environment protection;
- 8. National Nature Park "Synevyr";
- 9. Synevyr Eco, Silver Guide, Shepherd's Corner (earlier Synevyrska Otara).

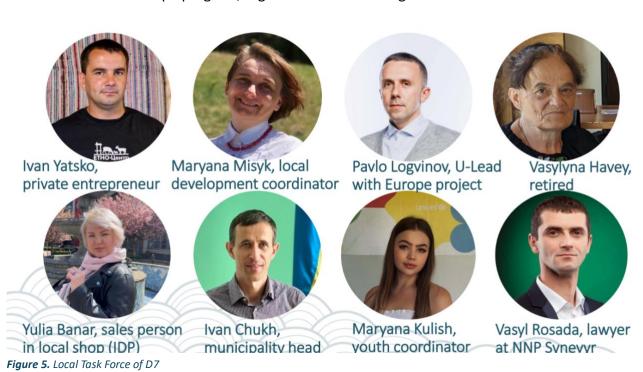

4. Step 2: Stakeholders Engagement: local task force and involving stakeholders

4.1. LTF composition

The Local Task Force of the Dynamo was formed from highly motivated and influential stakeholders, ensuring a balanced gender and age distribution as well as at a representation of different target groups at risk of exclusion (Youth, elderly, women, internal migrants).

The group composition is shown below, and it is composed of 4 men and 4 women:

- 1. Local rural municipality of Synevyr: Ivan Chup
- 2. Local rural municipality of Synevyr: Mariana Misyk
- 3. Local Youth group: Mariana Kulish;
- 4. Local business: Ivan Yatsko;
- 5. National Nature Park "Synevyr": Vasyl Rosada;
- 6. Local community members, also associated with various groups at risk of exclusion (women, retired, internal migrants): Vasylyna Havey
- **7.** Local community members, also associated with various groups at risk of exclusion (women, retired, internal war migrants): Yuliia Banar;
- 8. ULead with Europe program, regional office: Pavlo Logvinov.

4.2. Open Day

The first RURACTIVE public event, the Open Day, took place on 23rd of July 2024 in Synevyr Poliana village, at the "Shepherd's Corner" tasting room. The event gathered local stakeholders to present the project along with the discussion on challenges faced by the community, also typical for other rural communities of Zakarpattia. The total number of participants was 51 persons, of whom 13 were men and 38 were women with the following distribution:

AGE	GROUPS AT RISK OF EXCLUSION	RDDs	DOMAINS
12 minors,	Migrants 2,	Sust.agriculture etc. 5,	Policy 3,
7 people aged 18-29,	People with	Nature-based and	Industry/investors 18
20 aged 30-45,	disabilities unknown,	cult.tourims 15,	Public/users 33
9 persons iaged 46-	Long-term	Culture and cultural	
60,	unemployed	innovations 12,	
And 3 people aged	unknown,	Local services etc. 3,	
60+	LGBTQIA+ unknown.	Transversal 12.	

Figure 6. Open Day, held Shepherd's Corner

5. Step 3: Stakeholders Empowerment

5.1. LCT Recruitment

The Local Community Trainer for the Synevyr Community is Nataliya Kut. In a later moment, Viktoriya Babichyn also joined the training as an LCT assistant.

Natalia Kut comes from Ukraine. She lives in the village of Synevyrska Poliana Synevyr community. She is 36 and has a degree in English and German languages. She works as an English teacher in a local lyceum. She is a sociable and open-minded person. Her greatest strengths are meeting deadlines and attention to detail. She is accurate, motivated and willing to learn. She has

Figure 7. Local Community Trainer (LCT) of D7.

developed computer literacy. Her rural community needs digital development. She is highly motivated and results-oriented to be a local community trainer.

5.2. LWs1 Vision and Challenges

Local Workshop 1 (LWs1) was dedicated to defining the main development challenges of the Dynamo along with a vision of rural area development. The workshop took place in the premises of the rural municipality of Synevyr, on September 26, 2024. Using the community development scenarios for the selected RDDs, which were developed prior to LWs1, a discussion was set up to identify the rural development challenges within the community. An AI tool, suggested by IAAC, was used to produce an image of the community development vision (see Figure 9 below).

There were 26 participants, among them 13 new participants: 6 men and 20 women:

AGE	GROUPS AT RISK OF EXCLUSION	RDDs	DOMAINS
11 people aged 18-	Migrants 1,	Sustainable	Policy 7,
35,	People with	multimodal mobility	Research 1,
11 in aged 36-50,	disabilities unknown,	19	Industry/investors 1,
4 persons aged 51-65,	Long-term	Energy transition 11	Public/users 17
And 3 people aged	unemployed	Sustainable agri	
60+	unknown,	food 13,	
	LGBTQIA+ unknown.	Nature-based and	
		cultural tourism 18,	
		Culture and cultural	
		innovations 17,	
		Local services 16	

Figure 8. Activities during LWs1

VISION of community development, elaborated during the workshop:

An ecologically clean and economically self-sufficient mountainous rural community, with preserved natural resources and cultural heritage, developed tourism and a rich craft offer, proper road infrastructure

and communication, convenient mobility and high-quality social services, close-knit proactive and friendly residents, where people are happy and where one wants to live, relax and develop.

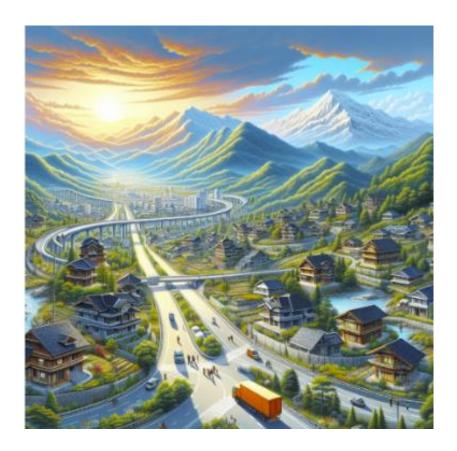

Figure 9: Al-generated image of the vision, after several tries

The many challenges defined by the workshop participants are presented in the table below.

	List of challenges
Challenge 1 - Place	There is a resource of wild-growing mushrooms, berries, medicinal
based	herbs, water springs, but no processing facilities in the community.
Challenge 2 - Place	Absence of local market/store to sell extra household food products;
based	good initiative with Synevyr-Eco, but no manager to develop this
	activity; lack of good quality handmade products.
Challenge 3 – For	Improving beekeeping productivity and honey quality in high-altitude
open call for	Zakarpattia
innovators	
Challenge 4 - Place	Low environmental consciousness level among local inhabitants; lack of
based	understanding of the harm of waste and wastewater pollution; no
	convenient offer for waste segregation at the level of households,
	community organizations (school, municipality, kindergarten, hospital
	etc.) and local SMEs and businesses.
Challenge 5 - Place	Absence of signs, signalization/marking of tourism objects and lack of
based	unified visualization of the destination and local attractions (also
	mentioned in the situation analysis of the national park).

Challenge 7 - Place	Absence of a convenient digital tool for self-organizing a stay in the
based	locality (people have to google and search for the local attractions at
	many different sites, and to go to different sources to organise their stay
	etc.)
Challenge 8 - Place	Absence of cultural tourism routes and lack of information (written or
based	otherwise recorded) on tangible and intangible cultural heritage.
Challenge 9 - Place	Low level of understanding among service providers about need to work
based	together on tourism development and related issues (waste
	management, tourism fee payment, sewage water management, visual
	image, level of services, general hospitality issues) and the absence of
	mechanisms to manage tourism fee collection.
Challenge 10 – For	Improving data availability in the tourism and hospitality sector
open call for	
innovators	
Challenge 11 - Place	Absence of sidewalks at all or at certain parts of the community
based Shallana 12 Blace	territory.
Challenge 12 - Place based	Barriers and inconveniences to pedestrians, people with disabilities,
based	mothers with carriages while moving within the community (lack of paved sidewalks, lack of marked pedestrian crossings, no "school" signs,
	etc.)
Challenge 13 - Place	Safety concerns for pedestrians and cyclists (absence of functioning
based	streetlights, drivers over speeding on the main roads (3 car accidents
	with children during the last 3 years, 2 casualties), lack of speed calming
	measures.
Challenge 14 – For	Smart streetlights for the increased safety of inhabitants and tourists
open call for	
innovators	
Challenge 15 - Place	Absence of public transport within the villages of the community and
based	for traveling to the closest town, district centre and region centre.
Challenge 16 - Place	Absence of proper navigation in the community (scheme of the village,
based	titles of streets, house numbers, signs for the beginning and end of the
	villages etc).
Challenge 17 - Place	Lack of cycling infrastructure and services (cycling lanes, bike parkings,
based	rent, sharing, repair, etc.), both for transportation and tourism.

5.3. LWs2 Learning from others

Local Workshop 2 (LWs2) aimed at learning from other already implemented practices and at defining solutions for the rural development challenges that were defined in LWs1. The workshop took place in Synevyr village on January 29, 2025 in the premises of the local canteen, where it was viable to gather all stakeholders and organize the space for their work comfortably. The total number of participants at this workshop was 32, of whom 16 men and 16 women. 15 new participants attended the meeting. Distribution of participants by different features follows.

AGE	GROUPS AT RISK OF EXCLUSION	RDDs	DOMAINS
6 people aged 18-35,	Migrants 2,	Sustainable	Policy 10,
12 aged36-50,	People with	multimodal mobility	Research 6,
10 persons aged 51-	disabilities 2,	9,	Industry/investors 4,
65,	Long-term	Energy transition 6,	Public/users 17.
1 person aged 66-80,	unemployed	Sustainable agri-	
2 minors,	unknown,	food 10,	
1 not identified.	LGBTQIA+ unknown.	Nature-based and	
		cultural tourism 19,	
		Culture and cultural	
		innovations 10,	
		Local services 14.	

Challenges and solutions selected for the discussion during **LWs2**:

	List of challenges
Challenge	Lack of processing facilities and marketing opportunities for wild-growing berries,
1 - Place	mushrooms and herbs
based	
Challenge	Absence of local markets to sell extra household food products
2 - Place	
based	
Challenge	Lack of Environmental Awareness and awareness about waste management and
3 - Place	disposal
based	
Challenge	Absence of cultural tourism routes and lack of information (written or otherwise
4 - Place	recorded) on tangible and intangible cultural heritage.
based	
Challenge	Low level of understanding among service providers about need to work together
5 - Place	on tourism development and related issues (waste management, tourism fee
based	payment, sewage water management, visual image, level of services, general
	hospitality issues) and absence of mechanisms to manage tourism fee collection
Challenge	Absence of Signage and a Unified Visualization for Tourism Destinations
6 - Place	
based	
Challenge	Improving Public Transportation Access to ensure equal access to essential
7 - Place	services
based	
Challenge	Absence of cycling infrastructure and services (cycling lanes, bike parking places,
8 - Place	rent, sharing, repair, etc.), both for locals and tourists; Including Absence of
based	infrastructures and measures to grant Pedestrian and Cyclist Safety

List of solutions proposals			
Proposal 1	Set up some kind of the physical marketplace in the form of community shop/ social enterprise/ cooperative, to sell local products both food and crafts.		
Proposal 2	Holistic effort to improve environmental situation and waste management in the community "ECOCOMMUNITY":		
Proposal 3	Develop tourism web-site with all the information about available services, resources, attractions, including cultural heritage (10 voices), with the option for self-planning of stay in the community. Development of new tourist routes and offers.		
Proposal 4	Community-wide promo event to show off attractions of the community.		
Proposal 5	Development of the app for available public and private transport services, exchange of information about demand and offer of the rides. Consider use of school bus/social bus once a week for rides to the market in Mizhhirya. Physical improvement of bus stop.		

After discussions with LTF and UNIBO mentors, the number of solutions was reduced to four, merging solution proposal 3 and four with a stronger focus on promoting local products and attractions.

5.4. LWs3 Fine-Tuning

Local Workshop 3 (LWs3) had to be organized in several turns, due to the large number of solutions and complexity of topics to be discussed and of course due to time limitations.

The first part of the LWs3 took place on March 20 in Synevyr village in the office of the municipality head and the music school. There were two solutions discussed during this workshop: Solution proposal 1 about the setting up of the Local marketplace and Solution proposal 2 about Environmental education.

The total number of participants at this first part of LWs 3 was 27, of whom 12 were men and 15 were women.

9 new participants attended the meeting. Distribution of participants by different features follows.

AGE	GROUPS AT RISK OF EXCLUSION	RDDs	DOMAINS
10 people aged 18-35,	Migrants 1,	Sustainable multimodal	Policy 12,
8 aged 36-50,		mobility 4,	Research 1,

8 persons aged 51-65,	People with	Energy transition 1,	Industry/
1 minor.	disabilities 4,	Sustainable agri-food 6,	investors 6,
	Long-term	Nature-based and cultural	Public/ users
	unemployed	tourism 14,	12.
	unknown,	Culture/ cultural innovations 1,	
	LGBTQIA+ unknown.	Local services 8,	
		Transversal 9.	

The second part of LWs3 was held on April 4, 2025, on the premises of the National Nature Park. The meeting gathered 17 participants, of whom 4 men and 13 women. 4 participants in this cohort were new participants. Further distribution is below:

AGE	GROUPS AT RISK OF EXCLUSION	RDDs	DOMAINS
5 people aged 18-35,	Migrant – 1.	Energy transition 1,	Policy 7,
8 in aged 36-50,		Sustainable agri-food 4,	Research 2,
4 persons aged 51-65.		Nature based and cultural	Industry/
		tourism 13,	investors 2,
		Culture/ cultural innovations	Public/users 8.
		6,	
		Local services 5,	
		Transversal 5.	

Figure 10. Activities during LWs3

The solutions developed through the Canvas were:

- Setting up the marketplace for local homemade products;
- Environmental Education Campaign for the Community of Synevyr to tackle waste management issues and preserve local biodiversity and ecosystems;
- Developing new tourism route in Synevyr community and holding the Day of local traditions.

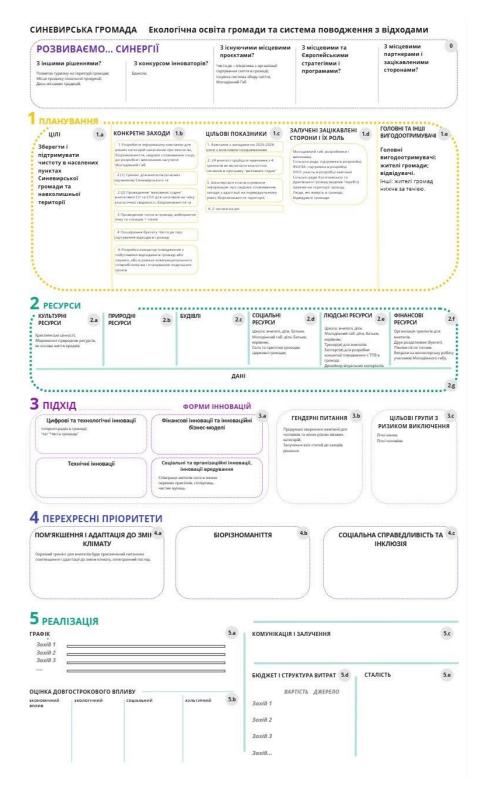

Figure 11. Screenshot of the RURACTIVE Canva Business Model for the discussed solution 2

The fourth solution - Improvement of the public transportation offer and conditions in the Community of Synevyr - was discussed internally with the LTF based on previously collected information and knowledge about the situation with mobility in the community.

5.5. LWs4 Co-Tuning

During June 2 meetings with the innovators were held in the Dynamo region:

- June 19: Meeting on the smart lighting solution, in Synevyr village, with 13 participants from Synevyr and Kolochava community, representatives of the power supply provider company, and staff of the municipalities. 8 men and 5 women were participating, of them 1 migrant (internally displaced person).
- On June 29 two innovators presented their solutions for controlling and monitoring the bee hives at the meeting in Khust, where 16 participants from the focus community as well as from Kolochava community and several other communities in Khust district participated. Of them 9 participants are new to the RURACTIVE activities. 7 women and 9 men participated in the meeting.

	Open Call for innovators: Selected Solutions		
Proposal 1	"Smart IoT-Driven Solutions for Sustainable Urban Lighting and Infrastructure"		
Proposal 2	High-altitude Optimisation & Nimble Evaluation for Yield, Control, and		
	Monitoring of Bees		
Proposal 3	Beekeeping via Delay Tolerant Networking		

Figure 12. Activities during LWs4

List of Solutions and action plan for implementation

Led by FORZA, and through a series of participatory workshops, a variety of local actors came together t to improve capacity building and effective community involvement in the decisions related to natural resource use and local development to revitalise rural life. The result has been the co-creation of four ambitious solutions. They all address different rural development drivers but follow the same principles to assist in advancing the sustainability and development of the region, generating opportunities for people to stay, creating incentives to strengthen the region through new talents and imporved capacities to enhance social services and livelihoods.

Sol. N.	Solutions' title	Related challenge/s
1	Setting up the marketplace for local	1.2. Absence of local markets to sell extra
	homemade products	household food products
2	Environmental Education Campaign for	1.3. Lack of environmental knowledge,
	the Community of Synevyr to tackle waste	awareness about waste management
	management issues and preserve local	and disposal and ineffective waste
	biodiversity and ecosystem	management system at the level of
		households, business and community
3	New tourism route in Synevyr community	2.1. Absence of cultural tourism routes and
	and the Day of Local Traditions	lack of information (written or
		otherwise recorded) on tangible and
		intangible cultural heritage
4	Improvement of the public transportation	3.1. Lack of public transport services offer,
	offer and conditions in the Community of	which would cover basic needs of
	Synevyr	access to essential services

6.1. Setting up the marketplace for local homemade products

Solution 1 Title: Setting up the marketplace for local homemade products	
Objectives of the	To provide income generation opportunities for the local people of Synevyr
solution	community to sell excessive household products (food and non-food) on
	the local market.
Brief Description	The solution aims at setting up a physical marketplace in the form of a
(max 250 words)	community shop/ social enterprise/ cooperative/ local shelf, to sell local
	products, both food and crafts.
	The solution also fills in the demand of visitors to the community for local
	products.
	The solution is partially building on the human and marketing resources
	with the earlier initiatives "Synevyr Eco", a web platform for selling of local
	products, synevyreco.org.ua, and "Shepherd's Corner", producer and seller
	of sheep dairy and meat products.

	The solution is utilizing the potential of local producers available in the
	community and the surrounding areas potential of local producers, social
	network and will integrate educational aspects by implementing activities
	within the information campaign to promote the value of local products,
	local biodiversity, relation to climate change mitigation and adaptation etc.
Relevant RDD and	Sustainable agri-food systems and ecosystem management
RDD subcategory	
Relevant	1.2. Absence of local markets to sell extra household food products
Challenge/s	
Specific Activities	1. Creation of the online catalogue of the local producers, (with marking the
	possibility of shipment).
	2. Establishment of a local business group in the community, formed of
	small producers of local products (cheese, meat, herbal teas, crafts etc.)
	3. Trainings for local producers on the CCA and CCM aspects, sustainable
	local resource management and biodiversity, ethical production and local
	value chains.
	4. Extend the assortment of the "Shepherd's corner" shop by adding local
	products produced in the Synevyr and Kolochava communities.
	5. Study (feasibility) the opportunity to set up a mobile local products shop,
	which can be used to sell local products at festivals, near tourism attractions
	etc.
	6. Launch awareness raising campaign on the value of local production for
	local economic development, biodiversity protection, health, visitor
	satisfaction and connection to the area. Awareness raising/promo
	campaign includes also the promotion of the online catalogue.
Targets	1.1. One online catalogue with information about at least 15 local products producers.
	1.2. Public presentation of the online catalogue in the community with
	invitation of local community members with particular focus on
	unemployed, women and youth. (monitor participation for the target
	groups)
	2. One business group with at least 10 regular participants formed and
	active with quarterly meetings of the business group to discuss current and
	future issues of collaboration.
	(At least 50% are women)
	3. At least 2 trainings for at least 10 local producers, on the topics of ethical
	production, CCA, CCM, biodiversity preservation, short value chains etc.
	4. Extending the assortment of the Shepherd's corner with at least 6 new
	local products.
	5. 1 Study of the feasibility of the mobile shop of local products.
	6. 1 Awareness raising campaign delivered. (participation of young people
	at lest 50%)
	at 163t 3070]

Location of	Village/town (where appropriate)
implementation	
implementation	Region
	• Country
Geography and	• Island
territorial context	Archipelago
	Coastal area
	Mountain area
	• Hilly
	• Flat
	• River
	Flood plain
Integration of relevant	Climate change adaptation and mitigation:
crosscutting	 Trainings for local producers with integrated topics of CCA and CCM;
	Awareness raising campaign with integrated topics of the value of
	local products in CCM and CCA.
	Diadinautitus
	Biodiversity:
	 Trainings for local producers with integrated topics of CCA and CCM;
	 Awareness raising campaign with integrated topics of the value of
	local products in CCM and CCA.
	Social justice and inclusion:
	 Providing opportunities for income generation particularly targeting
	unemployed, women, youth, through communication, messaging
	and the presentation of the online catalogue of local producers.
	 Increase in the value of local products.
Forms of	Digital and technological innovation: information on local producers in the
Innovation	online catalogue and at the open sources (Google).
considered	Social, organizational and governance: launch of cooperation among the
	suppliers and sellers at local level. Local business board.
Gender Sensitive	To consider equal access to opportunities for men and women, esp.
Planning aspects	disadvantaged, ensuring parity in the local business board, participation in
	trainings and other public events.
	To seek inter-generational cooperation by involving the youth in the
	awareness raising campaign, training and other public events.
	To record opportunities and duties of all genders involved, via a short survey
	to be conducted as part of the awareness raising campaign and, as a result
	included in the increase of visibility of role of women in rural development
	(in conjunction with Solution 7.2).
Resources/Capitals needed	Cultural resources:
	Traditional foraging

Traditional songs (about shepherds/their work, life in the mountains)

Legends about tea and herbs/plants

Traditional recipes

Traditional honey praising during Spas religious holiday

Traditional gatherings related to the transhumance cycle

Natural resources:

Pastures, meadows, forests, biodiversity

Buildings

Shepherd's corner premises

Information centers in Nature Park

Mobile shop

Social resources

Guesthouses networks

Selling places

Local community network: women network; business group

Human resources

Coordination of the local product collection

Coordination of the assortment extent

Coordinator of the business group

Trainer for business group

Volunteers to collect songs, legends, recipes

Financial resources

RURACTIVE resources (for training, awareness raising campaign, volunteer incentives)

Own resources of local producers

Main stakeholders involved and their contribution

- Shepherds' corner
- Cheeses of Oksana Kayren
- Teas and wool products from Nadiya
- Niroda family with meat products
- Honey from Vasyl Betsa
- National Nature Park "Synevyr"

Main and other Beneficiaries

MAIN: Local producers, Visitors

OTHER: local people, tourism service providers, municipality

Target groups at risk of exclusion

- Women
- Young people
- Older people
- People with disabilities
- Migrants and minorities
- Long-term unemployed
- LGBTQA+
- People without access to the internet

 General public Other specific groups not listed above Timeframe (M to M) Indicative cost Refrigerator (Ivan Yatsko) Trainings for business group members (2 1-day tr.) 700 euro (Ruractive) Feasibility study (Ivan Yatsko) Collection of data (Mariana Misyk+) Coordination of the business group (Yulia Banar)

Feasibility study (Ivan Yatsko)Collection of data (Mariana Misyk+)
Collection of data (Mariana Misyk+)
Coordination of the business group (Tuna Bahar)
 Online publication of catalogue (Ruractive, AI)
Awareness raising/ promo activities (Ruractive, Youth Center) Dublications (Burgetive)
Publications (Ruractive) Indicative funding Our resources of least ready save
Indicative funding • Own resources of local producers • CORTA Duranting
• FORZA Ruractive
Synevyr municipality
Long Term Impact Assessment Economic: income generation opportunities.
Environmental: CO2 emissions decrease due to short value chains;
biodiversity preservation.
Social: networking, community cohesion and collaboration.
Cultural: trust building and cooperation as a culture; consumption culture
and pride in own products.
Communication Communication and engagement of the community will be done mainly
and Engagement via: FB group of the community and viber groups used by local inhabitants.
Messages: "let's share the energy of our local products"; "using local
products protects our nature"; "our local products are our assets"; "more
local flavours at the Sheperd's corner"
Sustainability It is important to show local people benefits of local production and if they
consideration do, they will continue to support it.
Synergies with • "Synevyr-Eco"
other solutions • "Shepherd's corner"
 "Improvement of honey quality and beekeeping practices"
 "Development of new tourism offer for visitors"
 "Public transport improvement in Synevyr community"
 "Environmental awareness raising and improvement of waste
management system in the community".
 Community Festival.
Synergies with • Community development strategy.
local policies • Regional development strategy.
 Mountain regions development program.

6.2. Environmental Education Campaign for the Community of Synevyr to tackle waste management issues and preserve local biodiversity and ecosystems

Solution 2 - Environ	mental Education Campaign for the Community of Synevyr to tackle waste
manag	gement issues and preserve local biodiversity and ecosystems
Objectives of the	To develop environmental consciousness in local inhabitants within the
solution	community of Synevyr encouraging them to preserve local natural
	resources, improve the system of waste collection, sorting, processing and
	utilization to ensure a safe and sustainable local environment and
	sustainable tourism.
Brief Description	The solution provides a holistic effort to improve the environmental
(max 250 words)	situation and the waste management in the community. It comprises of two
	different groups of interventions:
	1) Educational part: it includes meeting, trainings, sensitizing events,
	communication, including via the church, local council members,
	parents' meeting at the school, other participatory events etc. Work
	with different categories of people (silver age in particular, since
	they are unaware of the harm done by throwing waste to the river).
	2) Study on the suitable waste sorting and collection system in the
	community (may be via separate project), starting with community
	buildings (school, kindergarten, municipality, ambulance etc.) and small businesses (shops etc.).
Relevant RDD and	Sustainable agri-food systems and ecosystem management
RDD subcategory	Sustamusic agni rood systems and ecosystem management
Relevant	1.3. Lack of environmental knowledge, awareness about waste
Challenge/s	management and disposal and ineffective waste management system at
	the level of households, businesses and community
Specific Activities	1. Co-create and co-implement information campaign for different
	categories of population: kids, teenagers, youth, parents, adults, elderly; on
	the topics of environment, biodiversity, conscious consumption. Together
	with Youth Center and the local task force.
	2.1. Trainings for trainers (teachers) of Synevyr and Synevyr Poliana schools.
	2.2. Compilation of educational materials for teachers: new compiled
	curricula and a set of practical tools/examples to challenge stereotypes in
	environmental roles and decision making.
	2.3. Delivery of "educational hours" for schoolchildren on the topics of
	environmental consciousness, biodiversity, conscious consumption.
	3. Organization of cleaning gatherings in the community, defining location
	and theme + picnic.
	and theme + pichic.

4. Production and dissemination of the brochure for the elderly on waste management: harm of waste to nature and sorting of waste at the households. 5. Feasibility study of the system of waste management in the community, within inter-municipality collaboration (with neighbouring community/ies). Targets 1. 1 Campaign with activities for the years 2025-2026 (with possible continuation in 2027 and over) co-developed and co-implemented with the involvement of min. 5 Youth Centre members. 2. Production of one type of brochures. 2. 20 teachers trained on how to deliver environmental topics within "educational hours" within the series of min. 4 trainings. 3. 1 Curricula and educational materials for 9 academic hours (at least one monthly) compiled. 4. 400 school children of all years received information on the conscious consumption; activities on climate change adaptation and mitigation at individual level; biodiversity of the territory; waste management in interactive and gamified manners. 6. 2 cleaning gatherings/picknicks per year organized in different parts of the community. (min 10 women, 10 men, 10 young) 7. 1000 of brochure disseminated (1000 households) and 500 elderly reached. 8. 1 feasibility study on sustainable waste management system developed and publicly discussed. Location of implementation • Village/town (where appropriate) • Region • Country Geography and territorial context • River • Flood plain Integration of relevant crosscutting Climate change adaptation and mitigation: Cone module with topics of CCA and CCM will be covered in the trainings for teachers to be later delivered to children within the Environmental	management: harm of waste to nature and sorting of waste at the
households. 5. Feasibility study of the system of waste management in the community, within inter-municipality collaboration (with neighbouring community/ies). Targets 1. 1 Campaign with activities for the years 2025-2026 (with possible continuation in 2027 and over) co-developed and co-implemented with the involvement of min. 5 Youth Centre members. 2. crosscutting One module with topics of CCA and CCM will be covered in the trainings for	Climate change adaptation and mitigation:
	One module with tenics of CCA and CCM will be severed in the trainings for
education series of school hours.	education series of school hours.

Biodiversity:

One module with topic of biodiversity will be covered in the trainings for teachers to be later delivered to children within the Environmental education series of school hours.

Social justice and inclusion:

The solution is to cover to the most possible extent the whole community without exclusions, since it is crucial that people in the community are on the same page.

Proper channels of communications with different target audiences will be planned within the information campaign (Act.1):

Young women taking care of children

Elderly population

Youth and schoolchildren

Working adults

Forms of Innovation considered

Social, organizational and governance: intergenerational communication and youth leadership in the process (intended).

Communication via an information campaign with the whole community to make it be on the same level of knowledge and understanding of the issue.

Gender Sensitive Planning aspects

Proper messages in the information campaign will be tailored not only to age groups, but also to genders in order to attract all people to the issue.

Including both men and women in visuals related to the information campaign and training curricula.

To involve both men and women, girls and boys in the cleanups.

Co-creation and co-implementation of the information campaign will be done with the involvement of all genders of youth who are willing to participate.

Resources/Capitals needed

Social: school network among teachers and children and parents. Youth hub: leader, kids, parents.

Networks of people living in settlements and streets of the community; Church communities.

Human: Teachers and students of the community. Management and the children of the Youth center. Trainers for teachers. Experts for the elaboration of waste management feasibility study (concept). Layout specialist for visual materials.

Financial: training for teachers; picnic costs; putting together the text, design and printouts; volunteer incentives etc.

Main stakeholders involved and their contribution

• Synevyr municipality: organization of municipality workers involvement, incl. School staff: communication with local inhabitants. School management and teachers: organization and

	participation in trainings and conduction of educational events for
	kids.
	Youth Center of Synevyr community: development and
	implementation of an information campaign.
	Churches: information support, promotion of the idea.
Main and other	Main: inhabitants and visitors of the community villages.
Beneficiaries	Inhabitants of the region, especially in the communities downstream
	Tereblya river.
Target groups at	• <u>Women</u>
risk of exclusion	Young people
	Older people
	People with disabilities
	 Migrants and minorities
	 Long-term unemployed
	• LGBTQA+
	 People without access to the internet
	General public
	Other specific groups not listed above
Timeframe (M to	June 2025 to June 2027 and beyond
M)	
Indicative cost	Not calculated yet
Indicative funding	Municipality financial resources; RURACTIVE; other
sources	
Long Term Impact	Economic: a more attractive community for the visitor economy
Assessment	Environmental: cleaner river, cleaner community, preserved and
	promoted biodiversity
	Social: community cohesion, more conscious consumption, less
	use of unnecessary plastic packaging
	 Cultural: change in habits, pride for own territory and progress
	acheived
Communication	Communication to be done through and by the children from the Youth
and Engagement	Center as per the developed information campaign. Channels, like Fb, Viber
	groups, church announcements as well as other visual communication
	tools will be taken into account.
	Messages: "clean community - clean spirit"; "we have what to be proud
	of"; "we live in the natural treasure, at it gets more and more valuable"
	"together we shape the greener future"; "clean, celebrate and connect"
Sustainability	In case a good level of understanding among local people of the need and
consideration	benefits of a clean environment will be reached, the sustainability will be
	easier to maintain. The Municipality as one of the main beneficiaries has a
	pivotal role to ensure sustainability of the improved environmental
	situation.

Synergies with	 "Synevyr-Eco" (consumption issues, local products use etc.)
other solutions	 "Shepherd's corner" (traditional land management etc.)
	 "Improvement of honey quality and beekeeping practices"
	 "Development of new tourism offer for visitors"
	 "Public transport improvement in Synevyr community"
	"Community Festival"
Synergies with	Community development strategy.
local policies	Regional development strategy.
	 Mountain regions development program.

6.3. New tourism route in Synevyr community and the Day of local traditions

Solution 3 – New tourism route in Synevyr community and the Day of Local	
	Traditions
Objectives of the solution	To develop tourism in the community by creating and marketing new sustainable tourism products, which promote and preserve the natural and cultural heritage of the region. To inform and sensitize visitors about the cultural and natural heritage of the community.
Brief Description (max 250 words)	To improve tourism conditions in the village for tourists and visitors, the solution aims at the creation of a new tourism offer (tourist route), improvement of infrastructure (signage) and improvement of information and communication (promotion) among the potential target groups. Along with these three components, there will be capacity-building activities via training, meetings and consultations on issues of quality tourism related services. Preservation and promotion of tangible and intangible cultural heritage will be achieved through the planning and organization of the Day of local traditions – an event for locals and visitors alike.
Relevant RDD and RDD subcategory	Tourism, based on natural and cultural resources
Relevant Challenge/s Specific Activities	2.1. Absence of cultural tourism routes and lack of information (written or otherwise recorded) on tangible and intangible cultural heritage1. To develop a digital map with different routes, attractions and tourist
	services in the destination. 2. To form a local tourism development group among the NNP Synevyr staff, Synevyr community and Kolochava community. 3. To set up a system for sending promotion visuals and information from the community to the regional tourism and resorts department to be disseminated via their channels. 4. To define key places for information panels about the community (map, distances etc.), local biodiversity, and install tourism information panels.

- 5. To make an inventory of the crafts and traditions that can be promoted in the destination.
- 6. To mark a local hiking trail (e.g. from Synevyr Polyana village to the sheep farm).
- 7. To organize a series of trainings for local HORECA and t33ourism s33tation/guiding service providers and cover issues of CCM and CCA local actions, biodiversity preservation and promotion, added value of their services via the above; waste management.
- 8. To organize The Day of Local Traditions, in order to promote local traditional heritage as well as women-led initiatives and make role of women visible.
- 8.1. To integrate masterclasses on local crafts, led by women.
- 8.2. To integrate a waste management stand.
- 8.3. To integrate topics on CCM and CCA locally into masterclass about local activities contributing to the local climate change mitigation and adaptation.

Targets

- 1. 1 Digital map prepared and integrated with Google map.
- 2. Print out a schematic map of the community + Kolochava attractions in 1000 paper copies.
- Local tourism development group set up with a minimum of 7 members and meets as needed or quarterly online.
- 4. 3 information panels about the community installed, all including information about local biodiversity.
- 5. 1 hiking trail to the sheep farm marked and signed (e.g. to the sheep farm).
- 6. 2 trainings on hospitality and biodiversity, CCA and CCM organized for at least 10 people each.
- 7. 1 online publication on local crafts and traditions prepared.
- 8. The Day of Local Traditions organized and visited by 100 participants and visitors.
- 9. At least 50% of all participants involved in the activities are women.

Location of implementation

- Village/town (where appropriate)
- Region
- Country

Geography and territorial context

- Island
- Archipelago
- Coastal area
- Mountain area
- Hilly
- Flat
- River
- Flood plain

Integration of	Climate change adaptation and mitigation:
relevant	Topics of CCA and CCM will be addressed during the training for HORECA
crosscutting	and transportation/guide service providers as well as during the Day of
	Local Traditions.
	Within the gathering program there will be a master-class about traditional
	activities, which contribute to climate change adaptation and mitigation at
	the personal, family, and community levels to educate participants on this
	topic.
	Biodiversity:
	Biodiversity topic will be addressed during the training for HORECA and
	transportation/guide service providers as well as during the Day of local
	traditions.
	Local biodiversity will be presented at three panels to be installed in the
	community.
	Social justice and inclusion:
	All the people from the community will be informed (they know) about the
	Day of Local traditions and can participate to them.
Forms of	Social, organizational and governance: collaboration among service
Innovation	providers along with the new tourism product (intended); inter-municipal
considered	cooperation.
	Trainings for service providers as a skills building tool.
Gender Sensitive	To consider equal access to income generation opportunities for all
Planning aspects	genders.
	To recognize workload, women bear to satisfy visitor needs and promote
	women role in tourism development and rural community development.
	To integrate the issue of gender equality and distribution of tasks in the
	trainings for the hospitality sector.
	To make women and youth visible both at the events and in the information
	dissemination and communication actions.
Resources/Capitals	
needed	Cultural: Knowledge of local traditions and natural resource management
	practices; Hospitality
	Natural: Surrounding nature, mainly lands of NNP Synevyr and local
	communities; biodiversity; Land to install information panels
	Buildings:

	Social : Guesthouse owners and managers' network; Restaurants managers network.
	Human : Expert for the preparation of the digital map. Local community trainer (Natalya) to work on data collection and filling in.
	Members of the group; Trail tracking and marking experts and workforce; Trainer on hospitality; participants, who will deliver content activities and the Day of Local Traditions.
	Financial: TBD
Main stakeholders	Guesthouse owners;
involved and their	Local guides
contribution	Shepherd's corner
	Synevyr Municipality
	Kolochava Municipality
	NNP Synevyr
Main and other	Hospitality service providers and visitors – MAIN
Beneficiaries	Local inhabitants
Target groups at	Women
risk of exclusion	Young people
	Older people
	People with disabilities
	Migrants and minorities
	 Long-term unemployed
	LGBTQA+
	People without access to the internet
	General public

local policies	 Regional development strategy.
	 Mountain regions development program.

6.4. Improvement of the public transportation offer and conditions in the Community of Synevyr

Solution 4 - Improvement of the public transportation offer and conditions in the		
Community of Synevyr		
Objectives of the	To improve the situation with public transport in the community along with	
solution	road safety in the Synevyr community.	
Brief Description	The solution is aimed at taking preparatory steps for further larger	
(max 250 words)	interventions on the community mobility aspect.	
	This would include an analysis of the mobility and safety situation in the	
	community; finding out the gaps in traffic signs and safety measures and	
	reporting them to the road police; finding out at the level of community	
	members how they use different transport means; analyzing all the above	
	and studying possible improvements in the public transport system for the	
	feasibility study.	
	Thus, from the elements of the solution discussed above, the following	
	activities were selected for implementation:	
	1. A safety audit;	
	2. Improvement of the signage and road crossings in the community;	
	3. Questionnaire on the use of public transport;	
	4. A feasibility study on the public transport improvement measures in	
	the community.	

Relevant RDD and	Sustainable multimodal mobility
RDD subcategory	
Relevant	3.1. Lack of public transport services offer, which would cover basic needs
Challenge/s	of access to essential services
Specific Activities	 Carrying out of the safety audits at least in two main settlements of the community, within the UN Security Council Resolution On Women Peace and Security 1325, under the leadership of an external expert with the involvement of local women and schoolchildren. Carrying out the analysis of the gaps in the traffic signage and road crossings. Filling in the gaps with new signs and road marking. Development and carrying out a representative survey on the patterns and needs of transport use in the community, including specific needs of working people and groups at risk of exclusion. This includes involving
	the Youth Center members to co-conduct the survey.
	Elaboration of feasibility study on public transport in the community (or together with Kolochava community)
Targets	 1. 1x Safety audit, which covers at least two main settlements of the community: Synevyr and Synevyrska Poliana. 2. 1 analysis of the traffic signs in the community carried out, using information from the safety audit, expert knowledge and field checks. 3. Instalment of traffic signs in the community and improvement of road signing as per analysis. 4. 1x survey on transport use in the community carried out, with involvement of the Youth centre members. 5. 1x Feasibility study elaborated with options of new service of public transport to be further developed and invested (possibly under intermunicipal collaboration with Kolochava community), taking into account demanded directions, timing and needs of various social groups: working members, groups at risk of exclusion.
Location of	 <u>Village/town (where appropriate)</u>
implementation	Region
	Country
Geography and	Island
territorial context	 Archipelago
	Coastal area
	Mountain area
	Hilly
	• Flat
	• River
	Flood plain

Integration of relevant	Climate change adaptation and mitigation:
crosscutting	The feasibility study should make an estimate of the impact of potential
crosscutting	public transport offers on climate change adaptation and/or mitigation.
	Social justice and inclusion:
	Improved safety of children and women on the road by communicating
	Safety audit results as well as traffic sign analysis results.
	The feasibility study should cover such aspects of the new public transport
	services as directions demanded; demanded timing; needs of groups at risk
	of inclusion; better access of elderly people to social services.
Forms of	Social, organizational and governance: public-private partnership; inter-
Innovation	municipal partnership; study of the patterns of and needs in use of public
considered	transport by different community members.
	Financial and business model: inter-municipal cooperation financial model.
Gender Sensitive	Women and children are the main target of the Safety audit.
Planning aspects	Women and children from the community will be involved in the Safety
	audit.
Resources/Capitals needed	Cultural: sense of community; safety values
	Natural: land plots to install signs, or other small objects
	Social: connections within the settlements; with NNP Synevyr
	Human: local inhabitants to assist with safety audit; expert in feasibility
	study; expert on survey; coordinator of traffic signage.
	Financial: TBD
Main stakeholders	Municipality
involved and their	Police representative
contribution	 Women-led initiative on safety audit according to UN Resolution
	1325
	Inhabitants for the safety audit
Main and other	 Local people and visitors are the MAIN beneficiaries
Beneficiaries	
Target groups at	• <u>Women</u>
risk of exclusion	Young people
	Older people
	People with disabilities
	Migrants and minorities
	 Long-term unemployed
	• LGBTQA+
	People without access to the internet
	General public

	Other specific groups not listed above
Timeframe (M to	June 2025 to June 2027 and beyond
M)	
Indicative cost	TBD
Indicative funding	Coalition 1235 in Zakarpattia (safety audit)
sources	Municipal budget (signs)
	RURACTIVE (feasibility and survey)
Long Term Impact	Economic:
Assessment	Environmental: improved understanding of the environmental impact of
	various transport means on environment
	Social: safety audit will bring up issues of children and women safety on
	the roads
	Cultural: better awareness about habits and impact of transport use
Communication	Communication about activity will be done mainly via Fb of the community,
and Engagement	Fb of FORZA, survey will be communicated directly. Messages: "Safety on
	the roads is our common task";
Sustainability	Sustainability will be made possible by integrating the LAP to the
consideration	operational plans of the municipality
Synergies with	 "Local marketplace" (bus stop near the shop)
other solutions	 "Shepherd's corner" (bus stop nearby)
	 "Improvement of honey quality and beekeeping practices" (beehive
	at the bus stop to demonstrate, Open call)
	 "Development of new tourism offer for visitors"
	 Smart street lights (Open call)
Synergies with	Community development strategy.
local policies	 Regional development strategy.
	 Mountain regions development program.
