

### Participatory planning using Miro

Val di Fiastra, Marche, Italy

Hilly ; Predominantly rural regions, close to a city

**Led by:** APS Borgofuturo

**Dynamo partner:** D8 – Fiastra Valley

Self-funded and volunteer based

**Local services, health  
and wellbeing**

**E-governance**

### Aim

The solution aims to provide an agile digital environment to allow a decision-making process involving different stakeholders. The solution was developed during the covid outbreak, when social distancing measures prejudiced the second round of implementation of in-presence roundtable discussions for participatory planning. With a clear action plan coming from the first round, in this second step Borgofuturo aimed to involve the public administration and experts' knowledge to jointly compile a business model canva.

The solution allowed people who were denied physical meeting to collaborate in shaping the regeneration strategy for their valley.

### Stakeholders involved

- Policy stakeholders
- Researchers
- Stakeholders in the industry/ services/ investors domain
- Stakeholders from the third/voluntary sector

### INNOVATION

**Social,  
organizational  
and governance**

### CROSS-CUTTING PRIORITIES

**Social justice  
and inclusion**

**Digital and  
technological  
innovation**
